Proposed changes:

1. Change color of the sidebar selected item in dark mode
    a. Im**port**ant accessibility change to make the sidebar item visible
2. Replace “My Groups” bar at the bottom of the port with widget for “My Groups”
    a. Bar at the bottom added too much the the homepage, and was subsequently rarely used
    b. Adding it as an optional widget will allow more customizability for the end user
        i. Although it takes up less space, it places the “Groups” in a more relevant part of the page
3. Change look of button at the bottom of the library widget
    a. Make it match the format of the other widgets
4. Change color of the “Quick action” tabs at the top
    a. Keeping them grey fits with the color scheme of the rest of the port
    b. Previously in dark mode: red
5. Remove welcome image
    a. Too much to take in
    b. Photo was never optimized for dark mode
    c. Presumably costs a lot of energy (and thus money!) to change (and they seem to change the photo relatively often!)
    d. If needed: a simple “Welcome to the port” message at the top of the page would suffice, with no photo
